Experience

CareDoct (Startup)

Kuala Lumpur, Malaysia

FULL STACK SOFTWARE ENGINEER

Mar. 2025 - Present

- Involved in high-level technical planning, product architecture, infrastructure design, and problem-solving with the engineering team.
- Rearchitected existing applications to improve performance, reliability, and scalability.
- Developed **AI-based** medical industry applications using **React**, and **FastAPI**.
- Resolved critical cloud deployment issues and improved overall infrastructure.

Freelance

Worldwide

SOFTWARE ENGINEER

Aug. 2024 - Present

- Developed a CBAM carbon tax calculation platform that enables organizations to input product data, and generate compliance reports.
- Contributed to a large-scale rice farming management system, overseeing farmers operations from pre-planting to harvest.
- Created a landing site for an educational institution with course details, registration, and placement test features.

IP ServerOne

Selangor, Malaysia

NETWORK & DEVOPS ENGINEER

Jul. 2024 - Dec. 2024

- Developed a fully automated and streamlined **VXLAN** management system using **Ansible**, and **Netbox** for data center network.
- Automated network management and deployments tasks using **Python**.
- Built network monitoring dashboards using **Grafana**, **Telegraf**, and **InfluxDB**.
- Managed and maintained **Cisco** and **Juniper** routers and switches.
- Developed scripts and pipelines for an **OpenStack**-based cloud platform, using **Bash**, **Ansible**, **Terraform** and **Packer**.

Universiti Malaya (UM)

Kuala Lumpur, Malaysia

TEACHING ASSISTANT

Mar. 2024 - Jun. 2024

- Aided in **Network Technology Foundation** course. Work includes helping lecturers, teaching students, and leading lab sessions.

Fend Tech Sdn. Bhd. (Startup)

Kuala Lumpur, Malaysia

FULL STACK DEVELOPER

Nov. 2022 - May 2023

- Developed security monitoring dashboard using **React**.
- Implemented system backend using **SupaBase** and **PocketBase**.
- Worked on AI models, including collecting, cleaning, and labeling datasets.
- Managed cloud environment on **Azure**, and **AWS**.
- Configured infrastructure and CI/CD pipelines on **AWS** using **AWS-CDK**.

Projects

Hybrid SDN Management System

[Read more](#)

UNIFIED MANAGEMENT FOR SDN AND TRADITIONAL NETWORKS

- Developed a network management system to manage hybrid networks (consisting of SDN and traditional non-SDN devices) allowing users to configure various policies using GUI environment.
- Technologies:** OpenFlow, Ryu Controller, NETCONF, Python, React.

Invitations Platform

[Demo](#)

CREATE BEAUTIFUL AND SEAMLESS EVENT INVITATIONS

- A web application designed for creating event invitations, with a primary focus on weddings. It features a beautiful, smooth, and responsive design, with multi-language support, allowing users to share event details and collect RSVPs seamlessly.
- Technologies:** Next.js, Supabase, TypeScript, TailwindCSS.

Z-Lisp

[Read more](#)

A LISP-LIKE PROGRAMMING LANGUAGE

- A Lisp-inspired programming language with a simple and expressive syntax, supporting numerical operations, string manipulation, and list processing. It features first-class functions, conditionals, dynamic typing, and an interactive evaluation system.
- Technologies:** C, MPC.

Skills

Programming	Python, Java, JS/TS, C, Go, Rust, Dart
Networking	CCNA, BGP, VXLAN, IOS, NXOS, Junos OS
SDN & Network Automation	OpenFlow, NETCONF, Ryu, Ansible, Python, Netbox, Grafana, InfluxDB
Web & Mobile	React, NextJS, Node.js, TailwindCSS, Supabase, Java (Android), Flutter, React Native, Expo, FastAPI
DevOps	AWS, OpenStack, AWS CDK, Terraform, Packer
System Admin	Linux, Docker
Languages	Arabic, English

Education

Universiti Malaya (UM)	Kuala Lumpur, Malaysia
BACHELOR OF COMPUTER SCIENCE (COMPUTER SYSTEM & NETWORK)	Oct. 2021 - Feb. 2025
• CGPA: 3.88 / 4.0, Pass With Honours (With Distinction).
